

Staffordshire County Council
General Risk Assessment Record Form

1. **Section/Service/Team** *Ilam CE Primary School* . 2. **Assessor(s)** R Linton. M. Prescott, S.Wiltshire

3. **Description of Task/Activity/Area/Premises etc.** Schools full opening Sept 2020 - Minimising the risk of transmission of COVID-19

What are the hazards?	Who might be harmed and how?	What are you already doing? List the control measures already in place	What is the risk rating – H, M, L? See section 5	What further action, if any, is necessary, if so what action is to be taken by whom and by when?	Action Completed State the date completed and sign.	What is the risk rating now – H, M, L? See Section 5
Exposure to COVID-19 The virus is spread in minute water droplets that are expelled from the body through sneezing, coughing, talking and breathing. The virus can be transferred to the hands and from there to surfaces. It can survive on surfaces for a period after transfer (depending on such things as the surface type, its moisture content and temperature).	Everyone on site. General transmission may occur: Through close contact between colleagues, pupils and visitors and touching contaminated surfaces.	• Anyone with COVID-19 symptoms or who have someone in their household who does is informed not to attend school. • Anyone developing COVID-19 symptoms during the school day is sent home and procedures followed to manage transmission risks • Control measures in place for clinically vulnerable staff and pupils. • Wellbeing support in place for staff and pupils. • Active engagement with NHS Test and Trace service. • Aware of LA Local Outbreak Control Plans. • Grouping pupils together and avoiding contact between groups • Social distancing maintained wherever possible between all adults on site.	H	• Record kept for 21 days of visitors to site. • Record of staff and pupils in groups. • Follow local health protection team advice. • Encourage staff and parents to engage with Test and Trace process and inform them immediately of the results of a test. • Minimise the number of contacts between staff and pupils • Review COSHH assessment for hand sanitiser and cleaning materials. • Review cleaning schedules to include more frequent cleaning of rooms/shared areas	Information sent to parents on July 15th Staff	M

What are the hazards?	Who might be harmed and how?	What are you already doing? List the control measures already in place	What is the risk rating – H, M, L? See section 5	What further action, if any, is necessary, if so what action is to be taken by whom and by when?	Action Completed State the date completed and sign.	What is the risk rating now – H, M, L? See Section 5
		• Frequent handwashing promoted- for all pupils and staff on entrance and exit to school and classrooms. • Hand sanitiser available in classrooms, shared spaces, entrance and exit points. • Good respiratory hygiene encouraged by promotion of 'catch it, bin it, kill it' approach. • Enhanced cleaning of frequently touched surfaces. • Disposable tissues available in classrooms. • Pedal bins for tissues emptied during the day. • Staff, parents and visitors informed of the measures in place to reduce transmission.	H	used by different groups. • Signage used to promote hygiene and social distancing. • Review stocks of soap, hand sanitiser and number of hand sanitiser stations, tissues. • Consider if skin friendly skin cleaning wipes are needed for younger children and pupils with complex needs. • Review bins consider replacing with foot operated. • Consider publishing risk assessment on school website.	meeting held on 13 th July and also to be held on Sept 1 st to underline the importance of these measures	

What are the hazards?	Who might be harmed and how?	What are you already doing? List the control measures already in place	What is the risk rating – H, M, L? See section 5	What further action, if any, is necessary, if so what action is to be taken by whom and by when?	Action Completed State the date completed and sign. Exposure to COVID-19 The virus is spread in minute water droplets that are expelled from the body through sneezing, coughing, talking and breathing. The virus can be transferred to the hands and from there to surfaces. It can survive on surfaces for a period after transfer (depending on such things as the surface type, its moisture content and temperature).	Pupils Transmission may occur: When travelling to and from school When arriving and leaving school.	- Start and finish times reviewed to keep groups apart as they arrive and leave school and to reduce demand on public transport at peak times. Staff are constantly reviewing the situation to ensure social distancing can be maintained in the entrance area. - Dedicated school transport arrangements and plans revised. - Parents, staff and pupils encouraged to walk or cycle to school.	M	- Process in place for removing face coverings when staff and pupils who use them arrive at school. - Inform parents of arrangements for drop off and collection procedures to reduce adult to adult contact. - Review arrangements for parents to “drop off” pupils.	These have been reviewed and agreed by staff and at an online governors meeting on July 9th	M

What are the hazards?	Who might be harmed and how?	What are you already doing? List the control measures already in place	What is the risk rating – H, M, L? See section 5	What further action, if any, is necessary, if so what action is to be taken by whom and by when?	Action Completed State the date completed and sign.	What is the risk rating now – H, M, L? See Section 5
Exposure to COVID-19 The virus is spread in minute water droplets that are expelled from the body through sneezing, coughing, talking and breathing. The virus can be transferred to the hands and from there to surfaces. It can survive on surfaces for a period after transfer (depending on such things as the surface type, its moisture content and temperature).	Everyone on site. Site related transmission may occur: Through close contact between colleagues, pupils and visitors and touching contaminated surfaces.	- One-way circulation routes in buildings and communicated appropriately to staff and pupil. - Timetable and use of classrooms reviewed to reduce movement around the building. This will be reviewed and updated as Key Worker School numbers change and fluctuate - Accessing rooms from outside. - Organising classrooms and other rooms used for learning to support distancing i.e. seating pupils side by side and facing forwards. - Unnecessary items and those items hard to clean removed from classrooms and learning environments. - Staff and pupils only bring essential equipment into school. - Thorough cleaning of rooms at end of the day. - Ventilation in the building maximised by opening windows, doors or using ventilation units. This will continue as much as possible bearing in mind the much colder winter temperatures. - Visitors on site limited and access to building controlled.	M	- Review fire safety procedures to ensure that any measures put in place do not compromise evacuation routes. - Ensure pupil groups and social distancing maintained during fire drills. NOTE: in an emergency social distancing may not apply. - Ensure increased ventilation measures do not compromise pupil or staff safety. - Review access points for visitors. - Arrange times that visitors, suppliers, contractors, external partners are on site to minimise numbers on site at any one time. - Minimise visitors to site by using virtual meetings where possible.	These have been reviewed by staff and there will be reminders and practices for pupils early in September	M

What are the hazards?	Who might be harmed and how?	What are you already doing? List the control measures already in place	What is the risk rating – H, M, L? See section 5	What further action, if any, is necessary, if so what action is to be taken by whom and by when?	Action Completed State the date completed and sign.	What is the risk rating now – H, M, L? See Section 5
Exposure to COVID-19 The virus is spread in minute water droplets that are expelled from the body through sneezing, coughing, talking and breathing. The virus can be transferred to the hands and from there to surfaces. It can survive on surfaces for a period after transfer (depending on such things as the surface type, its moisture content and temperature).	Staff and pupils Transmission may occur during learning activities and behaviour management.	• Consistent groups of pupils and staff and timetabling to keep groups apart and minimise movement around school. • Different groups kept apart where possible, assemblies or collective worship limited to one group. • Singing, wind and brass playing not to take place in large groups. • Older pupils encouraged to keep their distance within groups. • Limited interaction, sharing of rooms and social spaces between groups as much as possible. • Staff keep their distance from pupils and other staff (ideally 2 metres from other staff) as much as possible. • Sharing of stationary prevented and shared resources – equipment cleaned frequently and between groups or rotated to allow them to be left unused and out of reach. • Where possible actions taken for behaviour management will not involve touching a pupil. • Physical activity - Outdoor sports prioritised and contact sports avoided. • Outdoor equipment only for use by Hedgehogs	M	• Review size and composition of groups. • Staff to avoid face to face contact and minimise time spent within 1 metre of anyone. • Staff and pupils provided with their own pens and pencils. • Storage of rotated shared resources e.g. (sports, art and science equipment) for 48 hours (72 hours for plastics). • Review behaviour management plans and procedures. • Consider increased use of outside spaces for teaching and learning activities. • Avoid holding events where groups of parents and friends would be present such as school shows.	Groupings have been set up and parents and governors have been informed of the new procedures and structures.	M

What are the hazards?	Who might be harmed and how?	What are you already doing? List the control measures already in place	What is the risk rating – H, M, L? See section 5	What further action, if any, is necessary, if so what action is to be taken by whom and by when?	Action Completed State the date completed and sign.	What is the risk rating now – H, M, L? See Section 5
Exposure to COVID-19 The virus is spread in minute water droplets that are expelled from the body through sneezing, coughing, talking and breathing. The virus can be transferred to the hands and from there to surfaces. It can survive on surfaces for a period after transfer (depending on such things as the surface type, its moisture content and temperature).	Staff and pupils Transmission may occur through sharing spaces and equipment.	• Breaks staggered to limit numbers in corridors and circulation routes. • Lunch times staggered and pupils wash hands and enter lunch areas in their group. Groups kept apart and tables cleaned between groups. • Preventing toilets from becoming crowded by managing numbers accessing them at any one time. This includes both staff toilets those used by pupils • Staggered use of staff rooms, shared staff areas and offices to reduce contact with colleagues. All staff being constantly aware of issues regarding cups. Kettles and shared equipment to be wiped before exit. • Storerooms and cupboards accessed by one person at a time. • Outdoor play equipment cleaned between use by different groups. • Tasks organised so that the shared use and passing of work equipment is limited. Work equipment to be cleaned before and after use. • Contractors delivering services using school facilities, such as catering, and cleaning asked to provide copies of their risk assessment for managing exposure to COVID-19.	M	• May need to provide lunch in alternative rooms/spaces if hygiene and distance cannot be maintained in lunch areas. • Provide facilities to dry hands e.g. disposable paper towels and/or hand driers. • Information sharing with contracted catering and cleaning services to reduce exposure to COVID-19. • School kitchens to comply with the government's guidance for food businesses on coronavirus (COVID-19).	New lunchtime and break time procedures are now in place.	M

What are the hazards?	Who might be harmed and how?	What are you already doing? List the control measures already in place	What is the risk rating – H, M, L? See section 5	What further action, if any, is necessary, if so what action is to be taken by whom and by when?	Action Completed State the date completed and sign.	What is the risk rating now – H, M, L? See Section 5
Exposure to COVID-19 The virus is spread in minute water droplets that are expelled from the body through sneezing, coughing, talking and breathing. The virus can be transferred to the hands and from there to surfaces. It can survive on surfaces for a period after transfer (depending on such things as the surface type, its moisture content and temperature).	Staff and pupils. Transmission may occur when providing personal or intimate care	- PPE provided (such as disposable gloves, disposable apron) - Hand washing after providing care.	L	Staff using PPE instructed on the safe “donning and doffing” of PPE. Review personal care plans to assess PPE needs based on individual circumstances.	Is all in place	L
	Staff and casualty. Transmission may occur when providing First Aid	- Wash/sanitise hands before and after treating a casualty. - Wear PPE provided (such as disposable gloves, disposable apron). When directly treating people with symptoms of COVID-19 a fluid repellent surgical mask should be worn and eye protection may be needed where there is a risk of fluids entering the eyes due to repeated coughing, spitting or vomiting. - When performing CPR phone an ambulance and use compression only CPR until the ambulance arrives. If a decision is made to perform mouth-to-mouth ventilation, use a resuscitation face shield where available.	L	- Review Assessment of First Aid Needs. - First aiders instructed on the safe “donning and doffing” of PPE. - Maintain stocks of PPE. Where this is not available contact LA. List of LA PPE suppliers communicated to schools. PPE Exchange can be used to help with finding a supplier. https://www.ppeexchange.co.uk/	In place	L
	Resuscitation Council UK Statement: It is likely that a child having an out-of-hospital cardiac arrest will be known to you. We accept that doing rescue breaths will increase the risk of transmitting the COVID-19 virus, either to the rescuer or the child. However, this risk is small compared to the risk of taking no action as this will result in certain cardiac arrest and the death of the child.					

What are the hazards?	Who might be harmed and how?	What are you already doing? List the control measures already in place	What is the risk rating – H, M, L? See section 5	What further action, if any, is necessary, if so what action is to be taken by whom and by when?	Action Completed State the date completed and sign.	What is the risk rating now – H, M, L? See Section 5
	Staff Transmission may occur when supervising pupils taken ill with symptoms of COVID-19 and need direct personal care until they return home.	• Increase ventilation in the room if possible. • PPE provided for supervising adult: Fluid resistant surgical mask if a 2-metre distance cannot be maintained. Where contact with the pupil is needed: Fluid resistant surgical mask, disposable gloves and disposable apron.	L	• Maintain stocks of PPE. Where this is not available contact LA. • Supervising adult instructed on the safe “donning and doffing” of PPE. • Consider using first aiders to supervise to reduce numbers of staff who need access to PPE.		L
	Staff and pupil. Transmission may occur when staff administer medicines or supervise pupils who self-administer.	• Supervising staff to maintain 2m social distance.	L	• Review medication plans to assess PPE requirements (if any) for staff administering medication.		L

4. Tick (✓) if any of the identified hazards relate to any of the following specific themes:

Hazardous Substance	Manual Handling	Display Screen Equip	Fire	Work Equip / Machinery	Stress	Individual Person such as Young Person New/ Expectant Mother or Service User
					✓	✓

If any are ticked a specific risk assessment form must be completed separately. For example a COSHH form must be completed if a hazardous substance is used.

5. Risk Rating

The risk rating is used to prioritise the action required. Deal with those hazards that are high risk first.

Risk Rating	Description	Action Priority
High	Where harm is certain or near certain to occur and/or major injury or ill-health could result	Urgent action
Medium	Where harm is possible to occur and/or serious injury could result e.g. off work for over 3 days	Medium priority
Low	Where harm is unlikely or seldom to occur and/or minor injury could result e.g. cuts, bruises, strain	No action or low priority action

6. Assessment

Signature of Assessor(s): M.D.Prescott, R.A. Linton
Print Name:

Signature of Line Manager:
Print Name:

Date Assessed: 6th January 2021
Date Assessed: 1st March 2021

Review Date: February 28th 2021
Review Date April 19th 2021

7. Communication and Review

This risk assessment should be communicated to all employees and relevant persons who may come into contact with the hazards being assessed. The assessment must be reviewed annually or following a significant change, accident or violent incident.
